SKILLS/STACKS

- Cross-Functional Team Collaboration
- Software Engineering Leadership
- Troubleshooting and Problem Solving
- Version Control with Git
- Team Management
- Jenkins (CI/CD)
- Node.js
- Docker
- JFrog
- Java
- PHP
- C++
- C#
- C
- .NET
- Vue.js
- Next.js
- Flutter
- MySQL
- MariaDB
- React Native
- Mobile Development
- Database Management
- Agile and Scrum Methodologies
- Object-Oriented Programming (OOP)
- Front-end Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design, Accessibility

EDUCATION

- **Master's in Information Technology**
Software Development
Ateneo de Naga University
2023 – Present
- **Bachelor of Science in Information Technology**
Partido State University
2012 – 2016

Represented the university in the ACM-ICPC 2014 Philippine National Programming Contest, showcasing programming skills, and problem-solving abilities

OVERVIEW

- Seasoned Software Engineer with nearly a decade of experience in full-stack development, specializing in both backend and frontend technologies.
- Proficient in web, desktop, and mobile development.
- Strong understanding of cross-browser compatibility, accessibility standards, and cross-platform applications.
- Skilled in a diverse tech stack and experienced in CI/CD practices, with hands-on involvement in deployment processes.
- Collaborative team player with proven experience in Agile Scrum environments and cross-functional teams, contributing to fast-paced, high-impact projects.
- Passionate about continuous learning and building scalable, client-centric and user-focused solutions.

RECENT EXPERIENCE

Kryterion, Inc.

Oct 2024 – Present | Software Engineering Team Lead

Key responsibilities:

- Lead the design, development, and scaling of modern web and mobile applications using Java, SQL, Vue.js, Next.js, Tailwind CSS, Flutter, and React Native (iOS and Android).
- Provide technical leadership and architectural guidance to ensure the quality, performance, and scalability of software solutions.
- Mentor software engineers through regular 1-on-1 sessions, performance reviews, and career development planning.
- Coordinate with cross-functional teams, including Software Engineers, Product Team, Business Analysts, UI/UX Designers, QAs, DevOps, DBAs, CTO, and Managers to align priorities and drive strategic initiatives.
- Champion Agile methodologies, improving team workflows, sprint planning, and delivery efficiency.
- Foster a collaborative and growth-oriented engineering culture focused on innovation and continuous improvement.

Nov 2023 – Oct 2024 | Software Engineer (Full Stack)

Key responsibilities:

- Worked effectively in a fully remote environment, collaborating through Microsoft Teams, Slack, and Jira.
- Collaborated closely with international, cross-functional teams including Product Owners, Engineering Managers, TPMs, BAs, QAs, DevOps, UI/UX Designers, and fellow engineers to deliver high-quality features.
- Developed and maintained web and mobile applications with a focus on scalability, performance, and maintainability.
- Designed and integrated RESTful APIs with secure authentication to ensure protected access and reliable communication.
- Participated in Agile Scrum ceremonies such as sprint planning, stand-ups, and retrospectives to ensure alignment and timely delivery.

Technologies and tools: *Java (Spring Boot), Vue.js, Next.js, Flutter, React Native, Node.js, Tailwind CSS, Bootstrap, MariaDB, Liquibase, JWT, REST API, Docker, Gradle, Git, Jenkins, JFrog, RabbitMQ, AWS, Nginx, Janus, Redis*

PAST EXPERIENCE

Archdiocese of Caceres

● Sept 2021 – Nov 2023 | Full Stack Developer

Key responsibilities:

- Software Development – Designed, developed, and deployed scalable full-stack web and mobile applications, delivering features across frontend, backend, APIs, and databases.
- Debugging & Diagnostics – Performed in-depth debugging, root-cause analysis, and issue resolution to ensure application stability and user satisfaction.
- Infrastructure & Deployment – Managed server environments, implemented CI/CD pipelines, and secured system architecture to achieve reliable uptime and performance.
- Integration & Automation – Built integrations and automation tools for tasks such as document generation, data processing, and reporting, reducing manual effort.
- Support & Training – Delivered technical assistance, onboarding sessions, and user documentation to ensure smooth adoption and usability.
- Data Security & Compliance – Applied access controls, monitoring, and routine audits to safeguard sensitive information and maintain compliance standards.
- Procurement & Technical Advisory – Evaluated, tested, and recommended cost-effective software and hardware solutions to optimize IT infrastructure.

● Dec 2016 – Aug 2021 | System Developer

Key responsibilities:

- Progressed from IT and administrative support into system development, contributing to the design, development, and maintenance of web and mobile applications.
- Process Automation – Built solutions to digitize scheduling, contribution tracking, and reporting, reducing manual workload and improving accuracy.
- Application Enhancements – Improved usability, performance, and workflows in financial and administrative systems, resulting in more efficient operations.
- Technical Support – Delivered day-to-day IT assistance to end users, ensuring minimal downtime and smooth system adoption.
- Full Stack Contributions – Structured databases, implemented backend logic, and adjusted frontend interfaces to support complete system functionality.
- Domain-Aligned Solutions – Balanced technical expertise with an understanding of organizational practices and data management requirements.

Technologies and tools: *Java, PHP, React, Node.js, Bootstrap, Electron JS, Python, MySQL, CouchDB, PouchDB, REST API, Git, Jenkins, Docker, Relational Database and NoSQL, Android Studio*
