ACTIVE TECH STACK

Backend & Languages

Java 11/17/21 Spring Boot Spring MVC

Spring Data JPA Spring Security TypeScript

Node.js Microservices REST APIs

Cloud & Databases

AWS (S3, CloudWatch) AWS Rekognition

Supabase Liquibase PostgreSQL

MariaDB / MySQL Redis Stripe Twilio

AI & Developer Tooling

GitHub Copilot Claude Code AI Gemini AI Git

Postman Docker RabbitMQ Jenkins CI/CD

Frontend & Practices

Next.js / Vue.js shadcn/ui Tailwind CSS

Flutter / React Native a11y / WCAG Lighthouse

Jira (Agile)

EDUCATION

Master's in IT (System Dev)

Ateneo de Naga University
2023 – Present

BS in Information Technology

Partido State University
2012 – 2016
ACM-ICPC 2014 Contestant

ALEJO ROSTATA

Senior Software Engineer • Software Engineering Team Lead

PROFESSIONAL SUMMARY

Software Engineer and Team Lead with nearly a decade of experience designing, building, and scaling enterprise web, mobile, and backend systems. Specialized in architecting scalable Microservices and multi-tenant SaaS platforms using Java (Spring Boot), TypeScript, modern frontend frameworks, and AWS Cloud infrastructure. Adept at leveraging modern AI tooling (GitHub Copilot, Claude Code AI, Gemini) to accelerate engineering velocity, implementing Web Accessibility (a11y/WCAG), automated database migrations (Liquibase), payment/notification APIs (Stripe, Twilio), and Agile sprint governance via Jira.

TECHNICAL SKILLS & STACK OVERVIEW

Languages: Java (11/17/21), TypeScript, JavaScript (ES6+), PHP, Python, C++, C#, SQL, HTML5/CSS3

Backend Frameworks: Spring Boot, Spring MVC, Spring Data JPA/Hibernate, Spring Security (JWT), Node.js, Express.js

Frontend & Mobile: Next.js, Vue.js, React Native, Flutter, Electron, shadcn/ui, Tailwind CSS, Bootstrap, a11y, Lighthouse

Databases & Storage: PostgreSQL, Supabase, MariaDB, MySQL, CouchDB/PouchDB, Redis, Liquibase

Cloud, DevOps & CI/CD: AWS (S3, Rekognition, CloudWatch, EC2), Docker, Jenkins CI/CD, Nginx, Git, Gradle, JFrog, DataDog

Integrations & Tools: Twilio, Stripe, Resend.com, GitHub Copilot, Claude Code AI, Gemini AI, Postman, Jira, RabbitMQ, Agile/Scrum

PROFESSIONAL EXPERIENCE

Kryterion, Inc. — Phoenix, AZ, USA

Software Engineering Team Lead

Remote • Oct 2024 – Present

- Architect and lead development of multi-tenant enterprise SaaS applications using Java (Spring Boot), TypeScript, Next.js, Vue.js, and SQL databases.
- Provide technical oversight and sprint governance in Jira for 20 Software Engineers across 4 cross-functional sub-teams.
- Accelerate engineering delivery and code review standards by integrating AI-assisted developer tooling (GitHub Copilot, Claude Code, Gemini).
- Maintain active coding velocity delivering 8+ story points per sprint, focusing on core RESTful APIs, secure business logic, and system stability.
- Oversee site performance optimization and Web Accessibility (a11y / WCAG) compliance audits using Chrome DevTools & Lighthouse.
- Coordinate deployment pipelines, code freezes, and production rollouts with Release Managers and DevOps teams across QA, UAT, and production.
- Mentor engineers through scheduled 1-on-1 sessions, KPI performance evaluations (PAFs), and technical career growth roadmaps.

Software Engineer (Full Stack)

Remote • Nov 2023 – Oct 2024

- Engineered scalable backend services and microservices using Java 11/17/21 (Spring Boot, MVC, JPA, Security) and Node.js in a remote environment.
- Built AWS Cloud integrations: S3 file processing pipelines, AWS Rekognition identity verification, and CloudWatch/DataDog monitoring.
- Integrated payment processing and communication APIs (Stripe, Resend.com, Twilio) for secure transactions, SMS/email pipelines, and OTP workflows.
- Developed and validated secure RESTful APIs (JWT) using Postman, with RabbitMQ queuing and automated schema migrations via Liquibase.
- Utilized Docker, Jenkins CI/CD pipelines, and Jira to support rapid and reliable release cycles.

Archdiocese of Caceres — Naga City, PH

Full Stack Developer

Hybrid • Sept 2021 – Nov 2023

- Designed and deployed multi-tenant enterprise web applications with isolated tenant databases utilizing Java, PHP, and modern web frameworks.
- Created and secured REST APIs for administrative workflows, financial reporting, and document automation.
- Set up server environments and built custom cross-platform desktop and mobile applications for organizational operations.
- Conducted query optimization and data auditing across Relational and NoSQL databases (MySQL, CouchDB/PouchDB) ensuring high availability and compliance.

System Developer

On-site • Dec 2016 – Aug 2021

- Modernized departmental operations through custom digital solutions for scheduling, record management, and contribution tracking.
- Structured relational and NoSQL databases (MySQL, CouchDB), authored backend business logic, and delivered accessible user interfaces.
